

VENTALARM SIGNAL

STANDARD MODEL (FOR NEW INSTALLATIONS)

WHISTLING TANK FILLING ALARM FOR HOUSEHOLD DELIVERY

FEATURES

- Patented dirt screen keeps whistle resonance chamber clean
- Whistles to indicate tank is filling
- Allows for product expansion

BENEFITS

- Stops costly spills
- Prevents ruptured tanks
- One time installation - outlasts tanks
- Complete reliability and accuracy

SIZES AND MODEL NUMBERS

TANK OPENING	VENT PIPE	MODEL NUMBER
2"	2"	VS270

TECHNICAL INFORMATION

Straight model is used for vertical vent pipe installations. Use 90° elbow model when a 90° elbow bend from the top of the tank is desirable for a horizontal pipe run. Can be used for above and underground tanks. Stems can be cut for flat tanks.
